

GRANDMA'S

Pure and Natural™

LYE SOAP

Do you or someone you know suffer from the following conditions?

Following are customer testimonials from users of Grandma's Lye Soap.

Eczema: "My son was born in 2006 and quickly developed a severe case of eczema over his entire body. We have been trying to manage this with cortisone cream and have tried many other remedies. We were using Dermatotop Cream on him when my mom bought your product. I started using it and noticed instantly that I was able to taper back on his Dermatotop to using it only once per week as compared to every day. It is wonderful and I love the product. Just wanted to let you know." (A. Rusnak)

Psoriasis: "I have psoriasis and for years I have applied prescription ointments, creams and shampoos on the affected areas and nothing has worked. The lesions have gotten worse over the years and doctors have not been able to prescribe anything that I haven't already used to alleviate the **lesions and associated pain**. My Mother gave me a bar of "Grandma's Lye Soap". **Within four days of using the soap**, the lesions cleared up and **I no longer suffer with open lesions**. This has changed my life as I can wear shorts and dark colored shirts without being embarrassed." (B. Gregory - Columbia, SC)

Eczema and Allergies: "Our five year old son has eczema quite severely and we have tried many products including steroid creams, prescription creams and many home remedies. Due to the severity of his condition, we ask him to wear long pants in the summer and try to avoid anything that makes his condition worsen. Recently **our allergist suggested we try "Grandma's Lye Soap"**. He uses it as bath soap and we have been so pleased. **He felt immediate relief and told me to buy some for his school so he could use it to wash his hands while in school**. Our son takes quite a bit of medicine to control his allergies and to find a product that **does not have side effects and provides such relief is wonderful!**" (P. Senentz - St. Petersburg, FL)

Contact Dermatitis: "My husband has problems with contact dermatitis **from the chemicals at work** and uses this soap exclusively and it has **dramatically improved his dermatitis**. The different soaps he has used in the past have made his hands inflamed—with this soap his hands have not inflamed with usage. He loves this soap! (Juli Byrnes—Tulsa, OK)

Medication-related Itching: For years now, I have had a rare liver disease and one of the **side effects of the medication** has been a **recurring rash and unbearable itching on my back and scalp**. Additional medication to stop the itching has all been unsuccessful. . . I purchased your product at a "Cracker Barrel" restaurant and began to use it daily. **After a few days, the itching all but quit**. It's been over a month now and **it has not returned**. I have finally found relief and my hair has its shine back. **I am a believer in your product!** (B. Chapman—Ashdown, AR)

Dry Skin: "I am on my fifth bar of "Grandma's Lye Soap" and I love this product. I have oily facial skin but often **when using regular soaps I end up with dry shins etc**. I am a long distance runner, so my skin is often exposed to more environmental conditions than most, plus as a wildlife biologist I am outside a great deal of the time.**I do not see the dry areas on my shins or knees as I have in the past**. I also like the fact your soap is not perfumed so after I shower and put on some type of fragrance, the two are not fighting with one another." (D. Saugey - Jessieville, AR)

Diabetic Sores: "I am a retired nurse, 78 years old and live alone. Being a diabetic, I am careful of what I use on my feet. Recently, I became aware of a **burning, itching on my left leg on the ankle**. The area was very red with several small bumps. I bathed my foot with warm water and "Grandma's Lye Soap". **It stopped the burning and itching** so I used it again before bedtime. I have also used this soap for bathing and have shampooed with it - my gray hair is clean and shiny. Thanks Grandma!" (D. Crawford - Brady, TX)

Lichen Sclerosis (Diaper Rash): "I have Lichen Sclerosis, a chronic condition resembling diaper rash. At its worst only strong steroids can ease the burning. I am bathing with "Grandma's Lye Soap" every day, and leaving the soap on a few minutes before washing it off has been an aid in controlling the burning and keeps me comfortable. There is no cure for this condition, so **I am thrilled that I found something to help me cope.**" (J. Kuhn - Monroe Twp., NJ)

Intense Itching: "A few moths ago I was given a bar of "Grandma's Lye Soap". To my great surprise, years of intense itching were **completely gone within two weeks**. Dermatologists had, for decades, tried various creams and soaps, none of which helped the problem. Then came "Grandma's Lye Soap", and the itching stopped. **You have made my life so much better!** I am grateful." (L. Sexton - Franklin, NC)

MORE TESTIMONIALS ABOUT "GRANDMA'S LYE SOAP"

Flaking Skin: "I purchased a bar of your soap and found an **immediate (next day) improvement of a persistent flaking skin condition**. I ordered 3 additional bars from you and have been using them regularly and exclusively for bathing and hand washing. The skin condition change was dramatic. I also used the soap to wash my hair. This is such a practical solution to a human condition that I am satisfied far beyond my expectations. Thanks for your entrepreneurial spirit that made this product available for us." (R. Viguie – Cincinnati, OH)

Eczema: "For the last year or more, I have been suffering from eczema on both of my wrists. It began to spread up my arm and into my hand, as well as moved to my ankles and stomach. My doctor prescribed multiple medications, but they only kept it from spreading; never cleared it up. Then, about a week and a half ago I found your soap. I tried it out on one wrist only for two or three days. **The effect was so immediate** and the rash was clearing up so rapidly, I started using it in the other areas as well. Now, after only a little over of week, my year-long battle with eczema is coming to an end. **I no longer need the expensive medications** as the eczema is nearly cleared up. I wish I had taken before and after photos for proof! Than you SO much for putting this product on the market! Please feel free to use this testimonial to help others who are struggling with skin irritations, as I know it will help them as well." (D. Lorsung – North Branch, MN)

Poison Ivy: "Last week I broke out with poison ivy all over. I had been spraying Ivy Dry all over my body and was miserable. A gentleman stopped at my husband's job and dropped off a couple bars of "Grandma's Lye Soap" and my husband mentioned it said it was good for poison ivy. I asked him to cut off a piece and bring it home. I rubbed the lather on all of the blisters that night and when I woke up the next morning I was totally amazed! All the blisters were gone! I put it on again in the morning and at noon when it started itching again. I have very dry skin and was worried about putting it on without rinsing it off, but my skin did not dry out at all. This soap is amazing!" (Juli Byrnes—Tulsa, OK)

Head Lice: "When my daughter got head lice from another child at school I tried several over-the-counter products with no success and little, if any, improvement. I then tried an expensive prescription from the doctor with no success. After trying all these insecticide poisons on my child's head, I remembered what my grandmother told me years before. Her mother scrubbed her head with homemade lye soap every Saturday night to get rid of lice. **I scraped thin slivers of "Grandma's Lye Soap" into a fourth cup of hot water and let it dissolve for 30 minutes. I then applied this thick paste to the scalp and hair. It needs to stay on the scalp and hair for at least 15 minutes. Rinse with vinegar and water solution. The results were amazing! No more lice.** Shampoo every other day with this mixture for about a week and the lice should be gone. **What a safe and simple way to get rid of these pests. It also helped with itching scalp and dandruff.**" (K. Adams – Prospect, KY)

Insect Bites: "I had called your company about a week ago regarding your product and its effectiveness on bedbug bites. I have to say with great pride and joy, that it has really improved my legs and arms! They look a lot better than before. In fact, they're almost gone. **I am very impressed with the way the soap works.**" (A. Oakes – Cincinnati, OH)

Diabetic Sores: "While visiting my daughter in Oklahoma I got a bar of "Grandma's Lye Soap". **It is helping my diabetic foot when nothing else would.** We also cut the bars in small squares and put a small piece in with my white laundry. I have been giving a few bars to our friends who are diabetic to use on their feet. They think it helps also. We plan on keeping "Grandma's Lye Soap" around for a while." (R. Reed – Gurley, AL)

Soap Allergies: "I have developed an allergy to many soaps and I bought your soap from cracker barrel and loved it. **Thank you so much for making these soaps. I am not allergic to it.**" (G. Sorman)

Dirty Socks: "I purchased a bar of your lye soap at Ace Hardware in Pittsburg, CA. I used it on my grandson's dirty, dirty socks. **It was great.** My daughter has psoriasis. If it does half as good as it did on my whites, I am sold." (C. Mijares – Pittsburg, CA)

As you can see, different people get different results, but, they all got squeaky clean!

Unlike ordinary soap, our **special formulation** has resulted in a **pure, natural** soap that seems to have **exciting results**. We receive mail orders on a daily basis from people who use our lye soap exclusively for psoriasis, eczema, dry itchy skin, head lice, acne or just baby bottom soft skin.

Our numerous testimonials are evidence of the excitement "Grandma's Lye Soap" is receiving. The previous excerpts are quotes from testimonial letters received from some of our many satisfied customers.
