The creative gals from The Sewing Revolution in Australia were also in Houston and I was delighted to meet them after being "email friends" for several years. They showed me their projects

We had a **Sue's Cousins** collection some time ago and it was really popular.

We have another collection now. Each of the twelve girls is smaller to fit 5" x 7" hoops, larger to fit a hoop that is at least 10" x 13", and as multi-hooped pieces to create larger designs using a 5" x 7" hoop. Complete multi-hooping instructions are included. 37313 (\$119.00)

I saw samples of projects made from this collection and just loved them! I've always enjoyed mixed-media, and **If Wishes Wore Wings** combines all kinds of things! Nadine Knecht dyed the fabrics for her original, and knew that some of us weren't into that, so she provided the images to print out on fabric to reproduce them. This is what the author says: “If Wishes Wore Wings is an ARtAngel © design collection whose soul purpose is to take you to an ‘altered’ state of machine embroidery while creating your own collaged surfaces with messages meant to enrich and empower your life and the lives of others. Florence, our first ARtAngel© is designed to provide inspiration and send blessings while taking your embroidery machine to an ‘art’ level.

My wish for you as you stitch through this journey, is that you enjoy the creative process this ARtAngel© brings you and that your creations are an opportunity to share with others, pass on hope and encouragement, send comfort, good wishes and blessings... and that this creative journey simply brings you joy, helps you heal or takes you to a happy place. Nadine” 37476 (\$69.99)

What a gift this designer has given us with this collection!
