## We Love Our HQ Sixteens!

Find out why we've fallen in love with this fun way of finishing quilts! You can pull out all those unfinished tops and get them done, make charity quilts, quilt for friends, or even start a business!

- \* It's nearly twice as fast as most home sewing machines
- \* It has a full 16" throat depth, over 8" vertical clearance
- \* It has long arm capabilities and optional Stitch Regulator at less than half the price of long arm systems.
- \* It has a wide variety of the same kind of fun tools.

Because I'm the one who's done the most with the HQ Sixteen, please call or email me ([erica@ericas.com](mailto:erica@ericas.com)) so we can get together and I can show you some of my projects and let you see how easy and how much fun it is to work on!

### Happy New Quilters!

Pam Moffit and her daughter Nancy Davidson, Kimmell, IN
