Designed with quilters and sewers in mind!

Oliso™ Iron with Auto-Lift System™ helps eliminate scorching, tipping, burning and wrist strain

Only the award-winning Oliso steam iron has the patented Auto-Lift System™ for a safer and smoother pressing experience. Touch the Oliso iron's handle and it automatically lowers onto your fabric. When you let go of the handle, the iron safely lifts above fabric to help eliminate scorching, tipping, accidental burns and wrist strain.

Benefits of advanced Auto-Lift System™

- Prevents scorching if the phone rings or you are interrupted
- Avoid accidental burns common with exposed soleplates on ordinary irons since this iron always lays flat
- Help protect your iron from tipping and breaking
- Protect joints and wrists from strain caused by repetitive lifting and lowering.
- Save time – reduce pressing time by up to 30% by cutting wasted motion
- Iron's auto lifters are designed to prevent scorching or snagging even the most delicate fabrics

Other features of the Oliso Iron

- Automatic Shut-Off turns off the iron if left unused (8 minutes in vertical or horizontal position or 30 seconds if tipped on the side). Instantly restarts when you touch the handle.
- EXTREME STEAM system works three ways for great-looking results:
 1. Constant steam delivers smooth results in one pass.
 2. Horizontal burst of steam helps remove stubborn wrinkles.
 3. Vertical burst of steam acts like a handheld steamer for hanging laundry or drapes.
- Extra large capacity water tank with easy-fill side port saves time, eliminates spills (handy refill cup included)
- 360° pivoting power cord keeps it out of your way
- Electronically controlled soleplate provides stable heat for consistent, worry-free results
- Non-stick soleplate
- Powerful spray mist
- Easy self-cleaning
- 1440 watts

As used on PBS-TV “Fons & Porter Love of Quilting” TV Show (2006 series starting in June).
