

1 Mark stitching lines on the Texture Magic™. (either side)

Note: Do not be tempted to iron the wrinkles out of your Texture Magic™. They will disappear after they are steamed.

2 Pin the Texture Magic™ to the wrong side of your fabric.

Note: Add batting between the layers during this step if so desired. Batting will give the texture extra loft.

3 Sew along marked lines.

Note: The closer the sewing lines, the more texture will be created.

4 Thoroughly steam with the Texture Magic™ side up.

Note: The fabric will start to pull up during the shrinking process. When the process is complete the fabric will lie flat.

TO KEEP THE TEXTURE MAGIC™ SOFT AND SUPPLE DO NOT TOUCH THE IRON DIRECTLY ON IT.

Washer and dryer safe
